EDUCATION

Northern Arizona University — *Bachelor's Degree of Computer Science*

Graduation Date August, 2020

Located in Flagstaff, Arizona

Relevant Coursework
Web Programming
Advanced Web Programming
Principles of Database Systems
Software Engineering
Algorithms
Capstone Experience
Differential Equations
Calculus I, II, II

EXPERIENCE

iMATter Mobile Application –

Worked with a team to create and deliver an application for pregnant women in recovery from opioid use. Additionally, helped create an administrator website so that our client could manage the application and add information regularly.

Visit https://www.ceias.nau.edu/capstone/projects/CS/2020/Reboot-S20/ to learn more

Bugtracker –

Created a bug tracker application using ASP.NET Core 3.0 MVC, where projects can be made with tickets assigned to it indicating bugs. The ticket is customizable with a user being able to specify the status (open/closed) and severity of the problem. The application also has Authentication and Authorization with different user roles, Administrator and a regular user. The Administrator has more privileges than the regular user such as deleting other users and creating and assigning roles.

Custom Blog Application –

Worked on a small personal project where I created a blog application with basic Login and Register Authentication, ability to create new articles, as well as likes and comments functionality using Javascript, React, Express, Node, and Postgres.

SKILLS

HTML5, CSS3, and Javascript

React

PostgreSQL and SQL

NodeJs and Express

C# and ASP.NET

Github and Git

LANGUAGES

English – Fluent

Spanish – Fluent

HONORS

Lumberjack Scholarship
